

Special Issue

Sustainable Landscapes: Integrating Physical Geography, Ecotourism, and Nature Conservation

Message from the Guest Editors

This Special Issue aims to explore the synergy between physical geography, ecotourism, and the protection of nature in promoting sustainable landscape management. As tourism increasingly intersects with fragile natural environments, understanding the physical characteristics of landscapes and their ecological sensitivities becomes essential for planning, conservation, and policy-making. We welcome the submission of interdisciplinary articles that analyze how physical geography informs sustainable ecotourism practices, assess the impacts of tourism on natural landscapes, or propose innovative conservation strategies grounded in geomorphology, hydrology, biogeography, and climate science.

Guest Editors

Dr. Sanja Obradović Strålman

Dr. Nikola Milentijević

Dr. Ioannis Charalampopoulos

Deadline for manuscript submissions

1 February 2026

USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, GeoRef,
AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 23.7 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the second half of 2024).

Journal Rank:

JCR - Q2 (Geosciences, Multidisciplinary) / CiteScore - Q1
(Earth and Planetary Sciences (miscellaneous))
